

SPI Night Vision Systems

The NVWS is our latest Night Vision Weapon Sight. Featuring Generation 3 night vision tube technology the NVWS is packed with the user friendly features that work for you. Focus is achieved with a simple side mounted cam system. The reticle is illuminated for easy target acquisition. The reticle brightness is fully adjustable to suit the ambient conditions you are facing. Soft rubber eyecup with adjustable eyepiece to account for a variety of eyesight conditions. Adjustments for windage and elevation are easy to dial in. Comes with integrated rubber daylight lens cap.

NV-WS

Features and Specifications

State-of-the-art features include a precision 4x objective lens with micro-click side-wheel focus, illuminated red on green Mil-Dot reticle, integrated user-friendly controls, and a heavy-duty Weaver Mount system. The impressive NV-WS is also lighter in weight and mounts lower to the bore than any other night vision weapon sight in its class. The NV-WS design features an adjustable, red-on-green Mil-Dot reticle for easy target acquisition in total darkness.
